A7-I Rhinotire Applicator - Technical information

Electricity voltage AC. 220V

Maximum power 6.8KW

Working temperature: $193\pm 5^{\circ}\text{C}$

Speed of melting: 2 liters/20mins; consecutive working is available

Maximum storage capacity: 5 liters

Maximum working capacity colloid- pressed cylinder. 1.5 liter

Maximum size of the tire:

Internal diameter 250-610mm

External diameter 1100mm

Breadth 400mm

Maximum rotating speed of the tire during application: 300r/min

Maximum pressure: 0.6mpa

Machine dimension: length \times breadth \times height
=1880 \times 800 \times 1250sm

Weight 500kg
